FOREWORD

As the custodian of the pristine landscapes and rich cultural heritage of Haa District, it is with great pride and enthusiasm that I present the "Ecotourism Geo Mapping Survey Report." In collaboration with the Jigme Khesar Strict Nature Reserve (JKSNR), Department of Tourism, we embarked on a meticulous endeavor to chart every trail, cultural site, and natural wonder within our region.

This comprehensive mapping initiative not only signifies our commitment to promoting sustainable tourism but also serves as a testament to our dedication to conserving the natural and cultural splendor that defines Haa. Through meticulous data collection and analysis, we have crafted a comprehensive guide that ensures visitors have access to accurate information while treading carefully on our pristine environment.

From the rugged mountain trails to the serene monasteries nestled in the valleys, every corner of Haa has been meticulously documented, including altitude, distance, and estimated travel time. This invaluable resource will not only facilitate tourism but also serve as a tool for conservation, allowing us to protect our cherished landscapes for generations to come.

I extend my heartfelt gratitude to all those involved in this monumental effort, from the dedicated teams at the JKSNR, Department of Tourism, and HELVETAS Country Office for their fund support in carrying out this activity. Together, we have laid the foundation for a more sustainable and responsible approach to tourism, ensuring that Haa remains a beacon of natural beauty and cultural richness for all who seek to explore its wonders.

Tashi Delek!

1. Introduction

Haa Dzongkhag, located in the western part of Bhutan, is a relatively small district endowed with rich natural and cultural assets with an area of 1,899.20 square kilometers. Acknowledging the positive impacts of tourism, the Royal Government of Bhutan, in its 12th Five Year Plan (2018-2023), recognizes ecotourism as one of the flagship programs with the potential to improve livelihoods, create youth employment and diversify the economy while contributing in preserving Bhutan's rich cultural and natural heritage. It is within this context that the Dzongkhag Administration had developed "Destination Haa – Tourism Action Plan (2018-2023)" to fulfill its vision for developing Haa as a unique tourism destination. Almost all the 20 districts of the country have acknowledged tourism as the most promising path towards improving people's livelihood. Likewise, Haa with its unique culture and rich biodiversity is looking towards tourism development to diversify its economic growth, but very few developments have been made in this regard- the number of visiting tourists remains small relative to the immense potential of Haa as a destination for the forests and nature enthusiasts. Such places of historical, cultural significance and diverse flora and fauna have great potential to draw tourists in the future and attract nature and culture enthusiasts from within and outside the country.

Haa, known for its natural beauty and cultural heritage, was selected for the mapping project. GPS technology was employed to collect precise data on ecotourism sites, ensuring accurate mapping and tracking of potential tourist destinations for Haa. The team was assigned to collect geo points and tracks through GPS and SW Map. The team from JKSNR was deployed in the field for geo data collection on Lhakhang, Goenpa, Chorten, Nye and other religious sites, Gewog Office, VIIC, Hotels, Farmhouse, Ecotourism Trekking Route, Paved and Unpaved Roads.

1.1 Objectives

The purpose of the Geo mapping is;

- ✓ To identify key ecotourism attractions (products), assess accessibility, and provide a comprehensive overview for sustainable tourism development for Haa.

2. Survey Sites

The survey area cover Samar, Eusu, Katsho, Bji, Gakiling and Sangbay gewog to collect geo reference point and track for all Lhakhang, Nye, Chorten, Other religious sites, Gewog Office, VIIC, Hotels, Farmhouse, Eco-trail, Paved and Unpaved roads, other important amenities.

3. Approaches: Survey Modality

Data collected modality was done through GPS and SW Map: The field survey aimed to map ecotourism products under six gewogs, Haa Dzongkhag, utilizing points and tracks through GPS and SW map.

- **GPS Geo Points Collection:** Trained surveyors utilized GPS devices to record ecotourism sites, capturing relevant information such as latitude, longitude, elevation and time.
- **Track Recording:** Tracks were recorded both paved and unpaved roads, Trails, Trekking Route during the survey to analyze travel routes and assess accessibility to ecotourism attractions.
- **Data Validation:** Collected data was cross-verified for accuracy and consistency.

4. Outcome: Mapping

Within given scheduled, the team has conducted Ecotourism Product Mapping for Samar, Eusu, Katsho, Bji, Gakiling and Sangbay gewogs:

GPS Coordinates: [Latitude, Longitude] for all points

Attractions: Ancient monastery, traditional architecture, farmhouse, hotels, scenic landscape.

Accessibility: Paved and unpaved road access, Trail or trekking route. Trekking Route suitable for cultural enthusiasts.

Preservation of Cultural Heritage: Mapping cultural sites helps in the preservation of Haa's rich cultural heritage. By highlighting and promoting these sites, there is an increased awareness of their historical and cultural significance, encouraging both locals and tourists to appreciate and protect them.

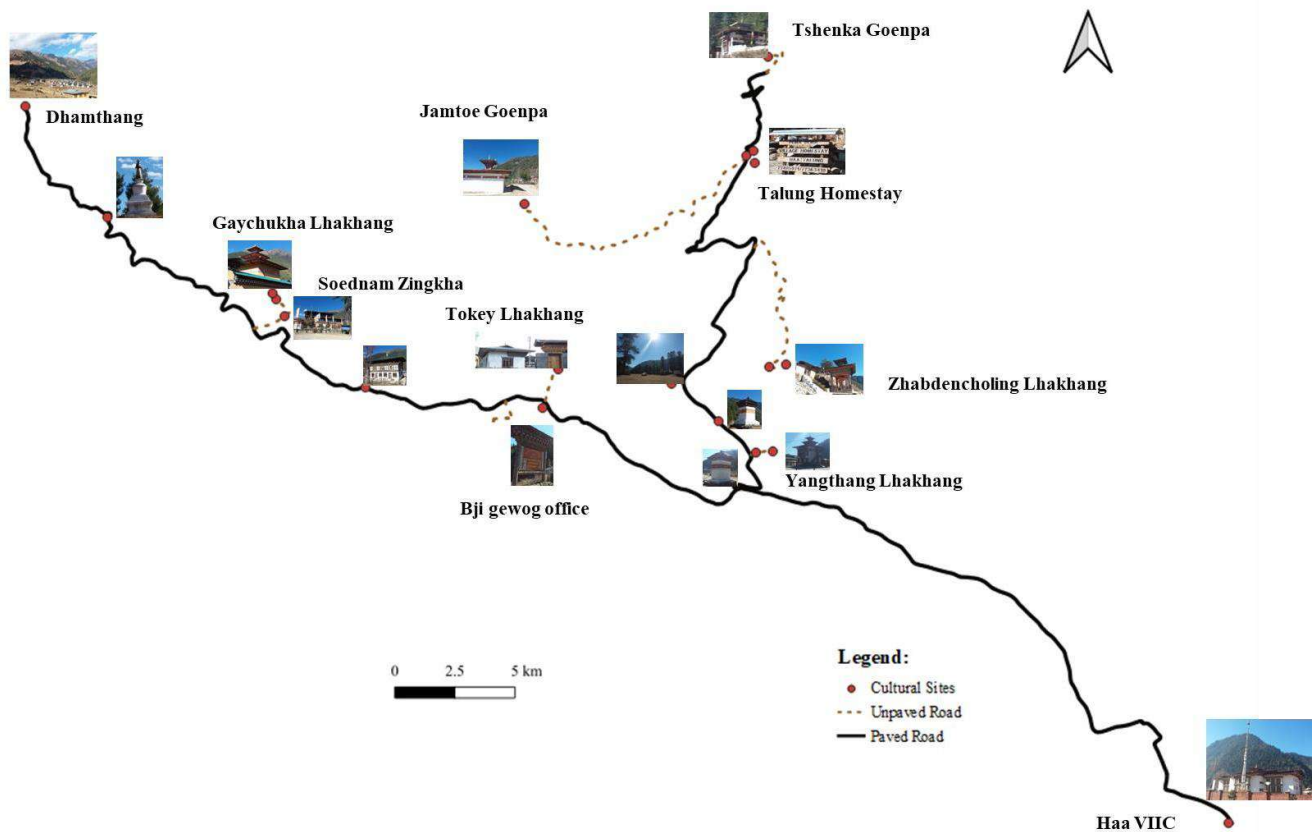

Tourist Engagement and Education: Cultural sites and eco-trail mapping provide a structured way for tourists to explore and understand the local culture, history, and environment. Interpretive signage and information at key points on the map can educate visitors about the importance of preserving the natural and cultural aspects and rich biodiversity of Haa.

Boost to Local Economy: A well-organized ecotourism destination attracts more tourists (national, regional and international), leading to increased economic opportunities for local businesses, such as hotels, restaurants, farmhouse, handicraft shops, and job opportunity to our local guide. This, in turn, can contribute to the overall economic development of the community and as well as Dzongkhag.

Haa Dzongkhag, located in western Bhutan, is renowned for its stunning natural landscapes, rich cultural heritage, and unique historical sites. In this report, we document the record of time taken and kilometer distances to reach various tourism sites within Haa Dzongkhag. This information is crucial for tourists and local authorities to plan journeys effectively and promote sustainable tourism in the region.

4.1 Cultural sites mapping under Bji gewog

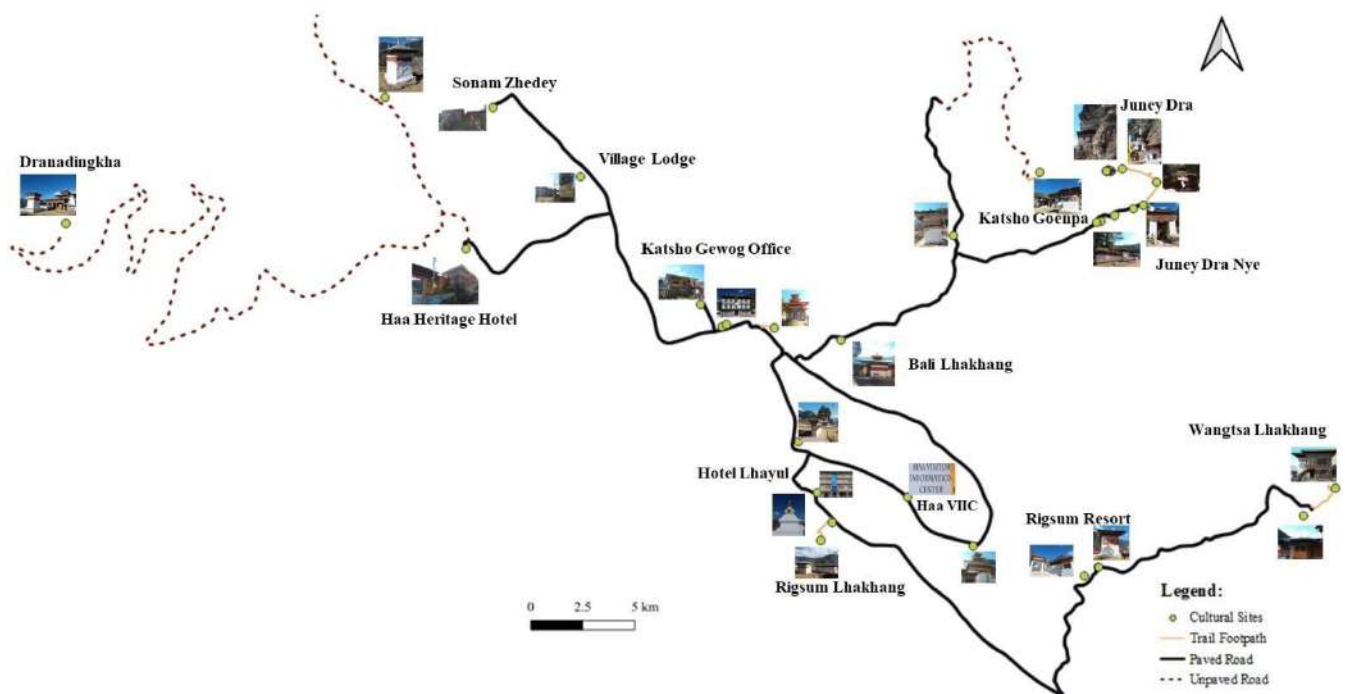

Bhutan is known for its stunning natural landscapes, rich culture, and unique traditions. Bji Gewog under Haa Dzongkhag offers several potential tourist destinations that visitors can explore. Exploring Bji Gewog in Haa Dzongkhag offers visitors a unique blend of spirituality, culture, and natural beauty, making it a memorable destination in Haa. Travelling to a place like Yangthang Lhakhang, Yangtoe Goenpa, Jamtoe Goenpa, Gaychukha Lhakhang under Bji gewog which can offer you unique blend of culture, nature and tradition. Every moment here is a journey worth taking. Situated in different village in Bji, homestays in Talung and Haatoe, once a simple farmhouse, has been transformed to offer additional cozy rooms, welcoming guests to a comfortable haven. They ensure that the guest experience is one of comfort, warmth and authentic connection with farming and Bhutanese culture.

4.5 Cultural site mapping under Gakiling gewog

The team has collected geo-coordinates and track route for Gewog Centre, Dorithasa village, Rangtse Nye, Youkha, Rangtse School, Ngatsena, Thangdokha, Sektena and Fentena Lhaxhang, Guest house, Chorten, Rivers, bridges, Paved and Unpaved roads and Basic Health Unit under Gakiling Gewog. Gakiling can showcase different religious sites to the visitors to enjoy and draw tourists in the future and attract nature enthusiastic. The most important and frequent visited is Rangtse also known as Sangbe Rinchenling under Gakiling gewog. Therefore, explore yourself the most unique and sacred abode cave of Guru Rinpoche and Khando Yeshey Tshogyal, where you can take memories and leave footprints after visiting Rangtse Nye. Similar to Rangtse Nye on the north, the naturally formed Khandro Dorji Phagmoi cave is found on the base of a hill. The cave is mysterious for number of reasons; no one knows the physical depth and the vastness of it and one can come across a stream as strange as it flows without any source or end in sight.

4.6 Cultural site mapping under Sangbay gewog

Sangbay geog is so called because there are many hidden treasures to be revealed at fortunate times by enlightened beings in the future. Tergola is known as „*the door to hidden treasure land*“ which is the door towards Sangbay and Sangbay geog is known to be the “*hidden treasure land*”. Sangbay Gewog has provided a comprehensive understanding of the region's potential for sustainable tourism growth. The meticulous use of GPS points and tracks has yielded valuable information regarding the accessibility of ecotourism products and the challenges associated with their promotion. The mapping of cultural sites and eco-trails contributes to the overall branding of Haa as a premier ecotourism destination. This strategic approach has the potential to attract a specific segment of tourists interested in immersive cultural and nature-based experiences, thereby enhancing the destination's reputation. It is also home to the native breed of cattle- **Nublang**. Such places of historical, cultural significance and

diverse flora and fauna have great potential to draw tourists in the future and attract nature enthusiasts.

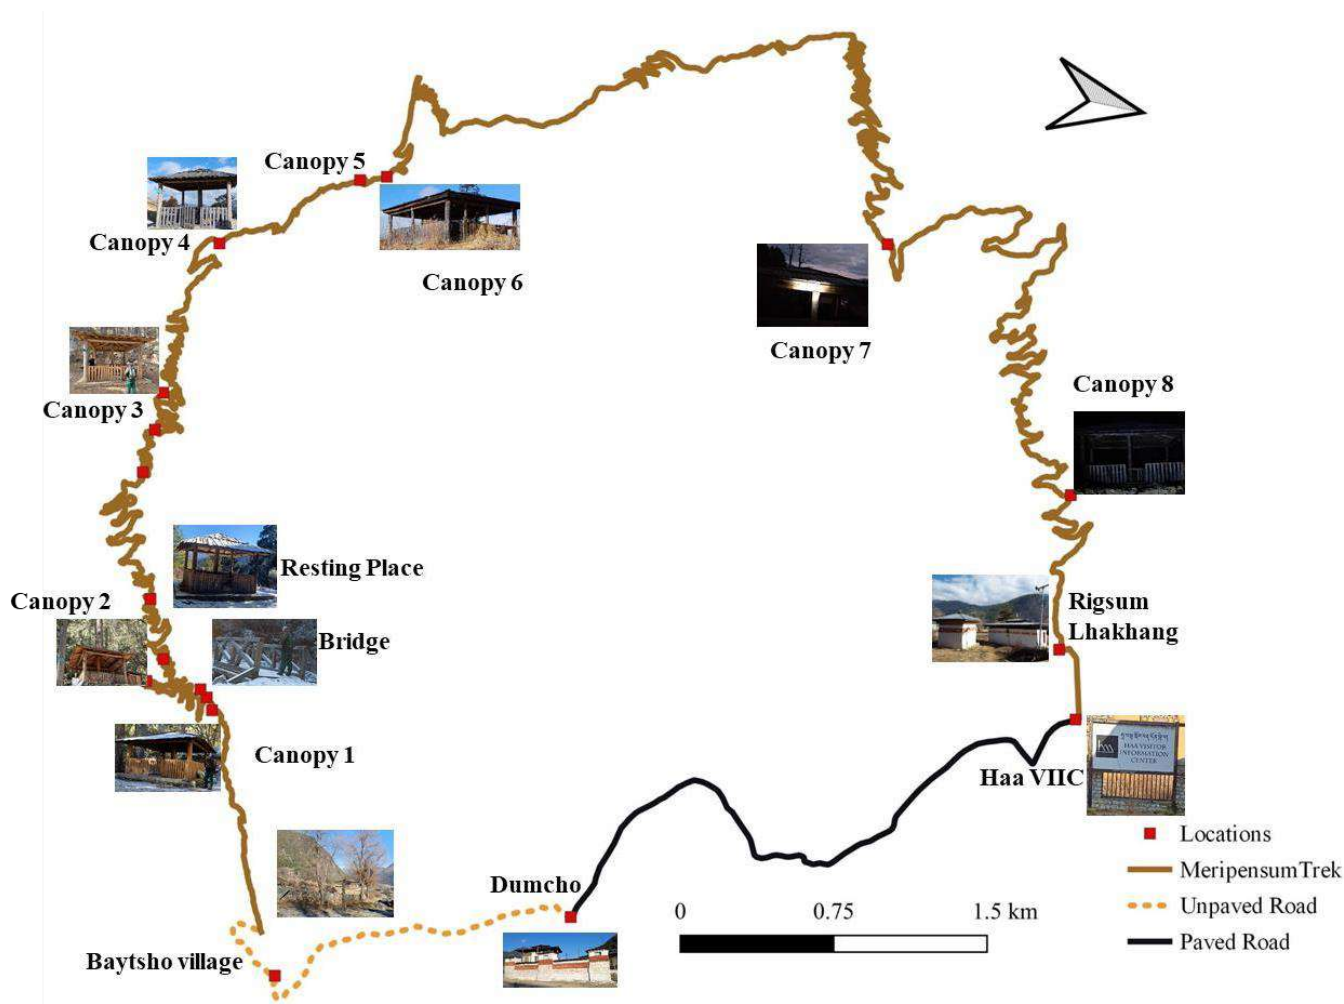

Team visited Sangbay Gewog Centre, Nakha, Mochu, Bebji, Shebji to collect geocoordinates and tracks for Lhakhang, Nye, Chorten, Other religious sites, Gewog Office, Farmhouse, Eco-trail, Paved and Unpaved roads, and other features like prominent Rufous-necked hornbill sighting sites and Bhutan glory sighting sites under Sangbay Gewog.

4.7 Meri-Puensum (Rigsum Goenpo) Nature Trek

Nestled in the pristine landscapes of Haa, the Meri Puensum region boasts a unique combination of biking and hiking trails that promise an exhilarating adventure amidst breathtaking panoramas. The trail is a unique landmark of Haa valley and there is a great deal of folklore relating to these three hills. The three brothers (sister) hills of Haa Dzongkhag present a breathtaking view, like heaps of flour in the middle of the valley. Local people pay homage by circumambulating around these mountains for they believe that the three Hill Mountains are embodiments of God as Jampelyang (Manjushri), Chana Dorji (Vajrapani) and Chenrizi (Avalokiteshvara). The trails wind through lush forests, meandering rivers, and charming villages, offering a diverse range of terrains for both biking and hiking activities. A trail begins at Dumcho & ends at the suspension bridge near Haa Town which is almost 37.41 km. You may need to ascend uphill for about 4-5 hours. As you hike you will come across various streams, bridges, wild mushrooms, flowers and birds. And finally, you reach the grand view point from where you can have a spectacular view of Mount Jumolhari, Chelela Pass and Meri Puensum. To endeavor to this hike, you may need to invest one whole day.

4.8 Panorama Hiking Trail

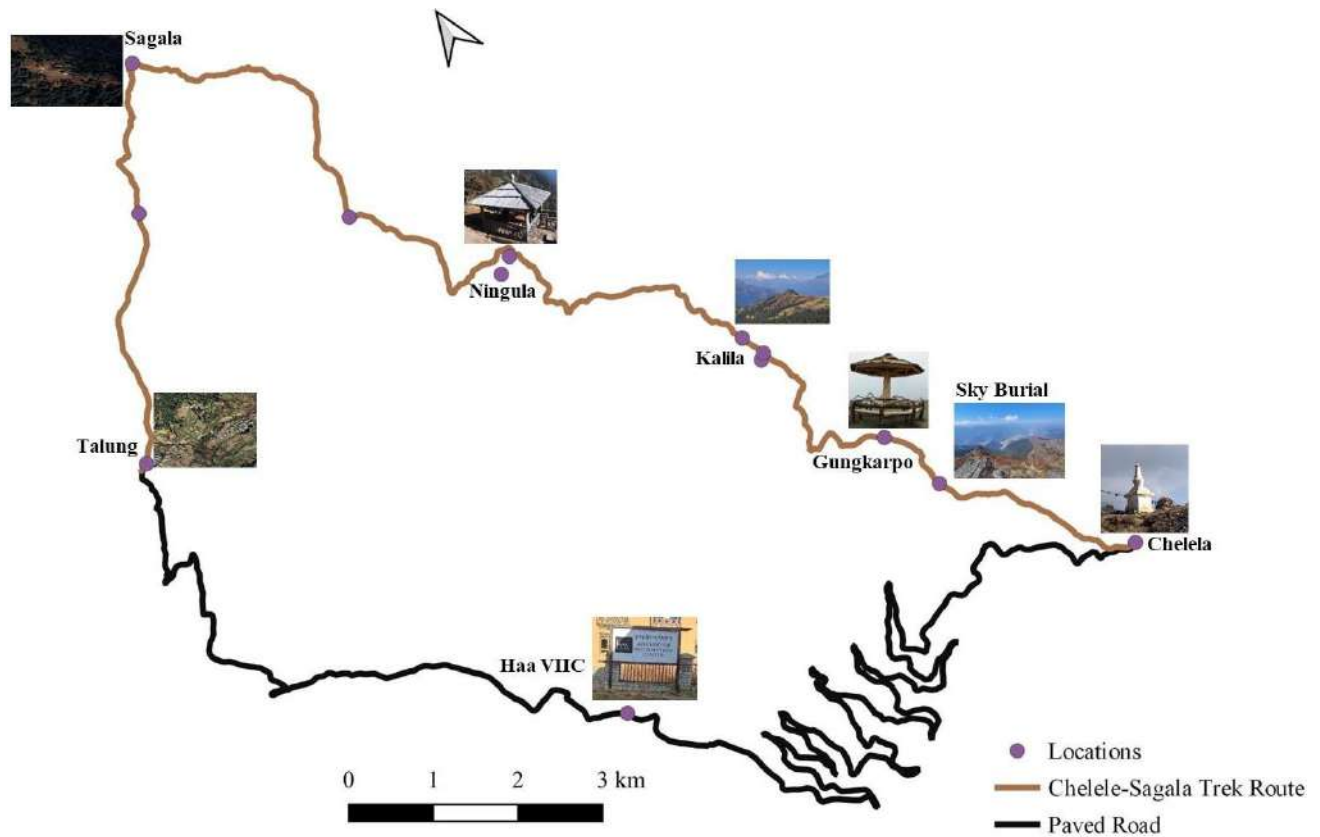

The “Haa Panorama Hiking Trail” was developed to showcase the pristine beauty and the intact environment of the bucolic Haa Valley. The route begins from Yangthang Lhakhang (2893m) and provides panoramic views of Haa valley, the sacred Meri Puensum and distant peaks, whilst immersing in the pristine pine forests. The scenic trail gently ascends to 3106m and passes through pine forests, pastures, and intact environment and traverses the monasteries of Yanthang (2700m), Katsho Eco-Camp (2994m) and Juneydrak (2908m) before descending into Wangtsa village (2850m). This enchanting trail covers a distance of 18.4 kilometers and takes about 8 hours to complete, at a leisurely pace. The panoramic hike offers the hikers a life time breath taking experience by simply defeating the art of a good photographer.

4.9 Chelela-Sagala Trek

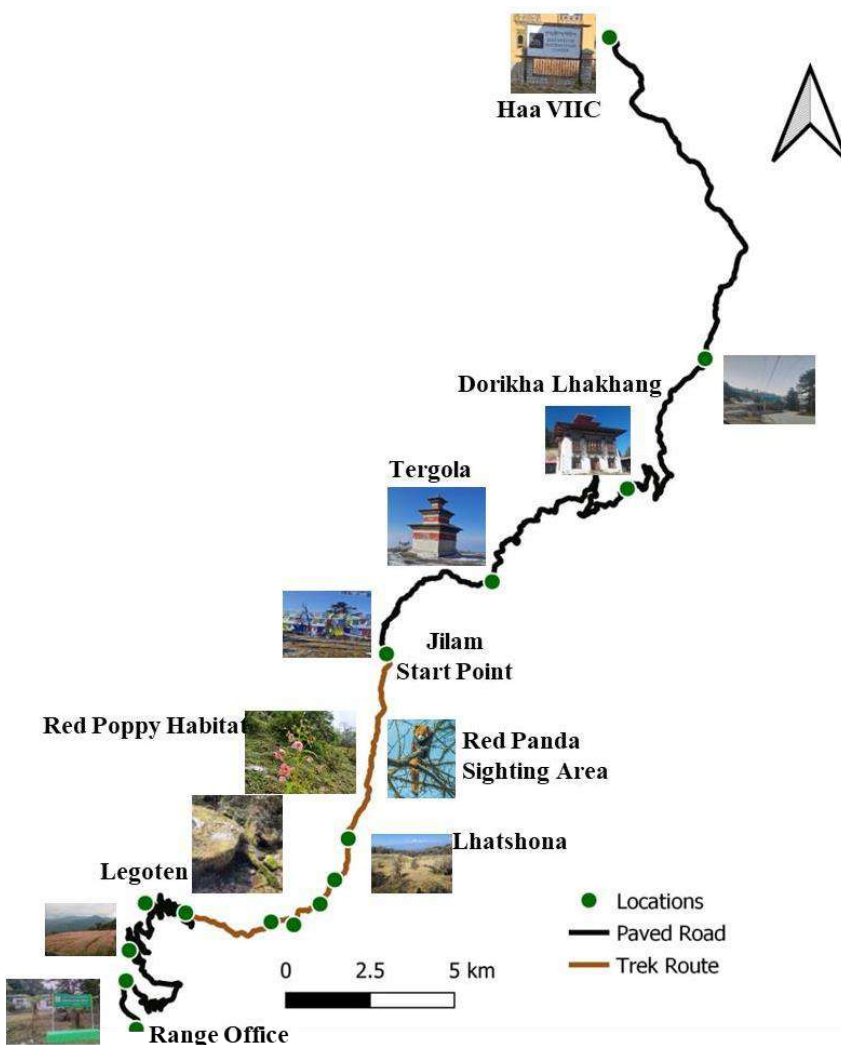

This Sagala Trek usually called as Chelela Trek combines an in-depth appreciation of the country's cultural attractions with a moderate to strenuous two days trek along a mountain ridge dividing the Paro and Haa Valleys of western Bhutan. Chelela-Talung trek route known as **“Twin valley trekking route or Sagala Trek”** located between two dzongkhags, Haa and Paro. The trekking route of 22.68 km from Chelela till Talung village provides immense potential of scenic beauty and one of the main highlights of the trek is the absolutely gorgeous 360-degree view from the Pass with Mount Jhomolhari, Kangchenjunga, mountain ridges of JKSNR, Haa valley and Paro valley along with diverse flora and fauna diversity. This trek offers scenic panoramic vistas of sacred Jomolhari and other Himalayan peaks plus views of the valleys themselves. Your trek begins from the Haa Valley (2726m) through a paved motor road till Chelela for less than hour. Taking the trail along the rightline, you will climb up gradually, then descending few minutes down were making several ascents and descents, walking through the trails of alpine meadows and rhododendron, you can come across the yak herders camp, and you will be more stunning views of the Himalayas and surrounding landscape.

4.11 Nubtshonapata Trek

This adventure **Nubtshonapata** Trek known as the „Great Lake of the West“ is nestled in the heart of the Jigme Khesar Strict Nature Reserve, Bhutan’s only strict nature reserve with altitudinal range from 2700m to 4200m. This trek offers a unique opportunity to explore the habitat of the elusive Snow leopard and endemic white poppy with diverse flora and fauna which covers 21.3 km from Haa Dranadingkha. Hidden in the folds of the Himalayas, Nubtshonapata or the Great Lake of the West is considered sacred by Bhutanese people and the trek is the popular trek under Haa Dzongkhag. Historically, the trek dates back to biography of Terton Sherab Mebar (religious treasure revealer) and the mythical breed of cattle “Nublang”. Such places of historical, cultural significance and diverse flora and fauna have great potential to draw tourists in the future and attract nature enthusiastic from within and outside the country. The Trek will offer many scenic and pristine sites of tourist interest and the best time to trek is in spring and autumn.

4.12 Jo Bay Tsho - “The Hidden Lake”

Nestled within the picturesque landscapes of Sangbay Dungkhaag under Haa Dzongkhag, the Eco Trail of Jo Bay Tsho, also known as “**The Hidden Lake**”, promises an unforgettable journey through thick broadleaved forests, stunning ridges, and serene meadows. This trail, rich in biodiversity and natural beauty, offers a glimpse into the hidden treasures of Bhutan's wilderness. A 75 km car drive from Haa VIIC would deliver you first to Amochu bridge, and yet another 20 km drive will reach to Mochu Lhakhang. Before making journey, visit Mochu Lhakhang of high cultural significance, get blessing from 1,000 statues of Guru Rinpoche, setting the stage for a spiritually enriching experience. As we set foot on the trail, we are immediately enveloped by the scent of wildflowers and the chirping of birds flitting among the trees. The path meanders gently upward, winding through a dense canopy of broadleaved forest. As we ascend higher along the ridge, the forest begins to thin, offering glimpses of the stunning landscape beyond. The trail hugs the edge of the ridge, providing panoramic views of rolling hills and distant peaks.

After a rewarding trek of 30 km along the ridge, we will finally arrive at our destination: Jo Bay Tsho, “The Hidden Lake” which is beautiful lake that spans an area of 1.82 hectares. Nestled in a serene valley surrounded by gentle slopes and Fir and Rhododendron Forest, this hidden gem takes our breath away. The lake shimmers like a sapphire in the sunlight, its clear waters reflecting the azure sky above. We will find a peaceful spot along the shore of Jo Bay Tsho, where we can rest and take in the tranquil beauty of this hidden oasis. Your adventure does not end at Jo Bay Tsho – the surrounding meadows beckon us to explore further. As we walk few 40 minutes up hill, you will be greeted by the sight of other stunning lakes nestled in open meadows nearby each with its own unique charm. Some are small and secluded, hidden among the grassy knolls, while others are larger, reflecting the towering peaks that loom in the distance.

After a restful night spent in the serene beauty of Jo Bay Tsho, we awaken to the soft light of dawn illuminating the shimmering waters of the Hidden Lake. Refreshed and invigorated, we have to prepare for the next leg of journey – a return trek that will take us through rhododendron and bamboo forests, along the ridge line of Youkha, and culminate with a stunning view from the Shetobir Rocky Cliff. And so, the trek from Mochu to Youkha village, making a loop trail to Jo Bay Tsho, will end at Youkha and travelling back to Sangbay Dungkhaag which covers 43.64 km distance. At the end of the day, a treasure will be cherished forever, carry the beauty of wilderness and your hearts will full of memories and gratitude for this unforgettable adventure.

4.13. Yaba-Sipsoo Trek

In the western reaches of Bhutan, nestled within the pristine landscapes of Haa and Samtse Dzongkhags, lies an ancient trail that winds its way through dense forests, quaint villages, and breathtaking vistas. This trail, steeped in history and natural beauty, offers a glimpse into the timeless charm of olden days trade route of Sangbay community. Let us embark on a journey along this path, starting from Sangbay in Haa and ending in Sipsoo under Samtse Dzongkhag.

An 80.59 km car drive from Haa VIIC would deliver you first to Sangbaykha Gewog Office, and another 13.43 km drive will reach to Nakha village. The walking journey begins from Nakha village, a tranquil village in the Sangbay gewog. As you start gradually descending down and ascending up trail of 6.30 km, we will reach at Yaba which is far flung village under Sangbay gewog. Leaving Yaba Village behind, the trail will lead us deeper into the heart of the forest. The chirping of birds and the occasional rustle of wildlife will remind us that we are guests in their natural habitat. Continuing the journey, we will leave Gurasey and Batasey behind and will enter the enchanting landscape of Oralay after tiring walk of 12.44 km. Here, the forest gives way to rhododendron dotted with wild bamboo of every hue. The air is filled with the hum of insects and the distant call of birds of prey. We have to pause ourselves to take in the beauty of Batasey ridge, a place untouched by time, where the modern world feels a world away.

Then the final leg of the journey will take us from Oralay to Sipsoo a walk of 17.32 km, a village nestled in the Samtse Dzongkhag. The trail winds its way through rugged terrain, crossing babbling brooks and ancient trail. With each step, we are reminded of the countless travelers who have

trodden this path before us, their stories woven into the fabric of the landscape. The journey along the ancient trail from Sangbay to Sipsoo has been nothing short of magical.

5. Conclusion & Recommendations

The mapping of ecotourism products in Haa Dzongkhag through GPS points and tracks provides valuable insights for tourism development. The field data collection highlights that, with strategic planning and sustainable practices, Haa has significant opportunities for ecotourism destination. These opportunities can contribute not only to economic growth but also to the conservation of the region's natural and cultural heritage. From pristine temperate forest and ancient monasteries to wildlife, the area offers a plethora of attractions that can cater to a wide range of tourists, including nature lovers, adventure seekers, and cultural enthusiasts. The field data collection for ecotourism mapping in Haa has provided a comprehensive understanding of the region's potential for sustainable tourism development. The meticulous use of GPS points and tracks has yielded valuable information about ecotourism products, their accessibility, and the challenges associated with their promotion. Cultural sites and eco-trail mapping contribute to the overall branding of Haa as an ecotourism destination. This can attract a specific segment of tourists interested in cultural and nature-based experiences, enhancing the destination's reputation.

The record of time taken and kilometer distances to reach various tourism sites in Haa Dzongkhag provides valuable information for tourists and local authorities alike. With easily accessible distances and reasonable travel times, visitors can plan their itineraries efficiently to explore the cultural and natural wonders that Haa has to offer. This data also supports sustainable tourism practices by promoting responsible travel and minimizing environmental impact. Haa is slowly emerging into ecotourism destination with rich natural resources and diverse wildlife, the tiny valley is a haven for cultural and nature enthusiasts. The promotion of ecotourism in Haa reflects Bhutan's commitment towards protecting its rich biodiversity and ensuring a harmonious balance between people and the environment. If you are seeking an authentic and immersive travel experience, Haa is the right destination. Travelling to a place like Haa, you can't help but appreciate its stunning natural beauty and the spiritual pull it has on its visitors. Haa valley has a unique charm that fascinates those who have visited and calls those who haven't.

Addressing challenges and implementing recommendations will contribute to sustainable ecotourism, benefiting both tourists and local communities. We extend our gratitude to the local communities, surveyors, and authorities who supported this mapping initiative. Thank Helvetas Bhutan, Department of Tourism and Dzongkhag Administration, Haa for fund support.

“Every moment here is a journey worth taking”

Recommendations:

- ✓ Develop infrastructure for improved accessibility to remote ecotourism sites. While some areas have relatively better road infrastructure, others require more attention and development.
- ✓ Implement sustainable tourism practices to preserve cultural heritage and natural beauty.
- ✓ Provide information centers with maps and guidance for tourists through different media.
- ✓ Collaborate with stakeholders and local communities for community-based tourism initiatives.
- ✓ Community engagement and awareness cum training for sustainable tourism practices.
